THE CROWD GROWS LARGER.

Thousands Find Pleasure and Health at the Seaside - Amusements for Old and Young-Shovel Carriers and Anglo-Manines-Pittsburg Well Represented.

INPECIAL TELEGRAM TO THE DISPATCE.; ATLANTIC CITY, August 3 .- As the heat intensifies in the cities throughout the country the crowd increases in Atlantic City, where the warmest days are welcomed by everybody. The warmer the weather the better the bathing. Fully 10,000 people are tossed about in happy confusion among the breakers every day, and out of this number fully 2,000 are from Pittsburg and Allegheny. The month of August has always been recognized as the month of vacations among the business men and their employes in Pittsburg, and this year promises to be no exception. Mr. E. D. Smith, the passenger agent said that the hundreds who came to Atlantic City on the train were less than half of those who left Pittsbarg, many of them going further East and some stopping in Phila-delphia. The party is quartered at the different hotels, and will remain about two weeks,

delphia. The party is quartered at the different hotels, and will remain about two weeks. There are varied attractions and entertainments in Atlantic City this year. Those of last year are doubled. For a mile along the grand board walk promeands attractions of every description abound on either side.

As the season progresses fads are becoming more and more fashionable. The young lady who does not carry a shovel in the morning is not looked upon with much favor by those who make and remake the styles at the seashore. From 9 o'clock till 1:30 the handsomest girls in the country, who make their summer home here, can be seen promenading the principal avenues and promenades of the city with small shovels mounted on their shoulders a la railroad style. It is not a thing of beauty nor a joy forever, but it is stylish and they must carry them. These shovels are made of black painted sheet iron about four inches square, with a three or four foot hickory handle attached. They are used on the beach by these belles digging holes in the sand in which they hury themselves up to the knees and sit for hours in the blazing sun firiting with some Pittsburg or Philadelphia dude who wears a sash, smokes cigarettes and says saucy words.

The latest fad among the Anglo-maniacs is the "English smoke," It consists of a sweet briar or meerschaum pipe of the most hideous shape, attached to a long stem and filled with cigarette dust or coffee grounds, which the dudes swing from between their expressionless lips as they stroll up and down the beach, imitating, in their mind—for some of them have a chemical trace of brains—the noblemen of England.

CHILDREN'S DANCING EXHIBITONS

CHILDREN'S DANCING EXHIBITONS are the most fashionable social affairs of the evening here this year, and many of them are marvels of beauty. On Wednesday evening about 60 of the best dancers among the chil-dren of Pittsburg and Philadelphia gave an exdren of Presser; and Philadelphia gave an exhibition of their accomplishments as graceful
dancers before 3,000 people at the Mansion
House pavilion. The affair was directed by
Prof. Charles C. Martel and Prof. Constantine
Carpenter, and eclipsed anything of its kind
ever seen hore.

Aside from this, the big hops, which are given nightly on this grand pavilien, seem to be owned and virtually run by the Pittsburg contingent in Atlantic City. One never feels lonely here. At the hops in the pariors, on the veranda or in the magnificently-decorated and spacious dining halls of the Mansion, Mc-Glade's Pittsburg Iriends are to be seen, always enfective themselves. enjoying themselves.

DOWN BY THE SEA. Cape May Visitors Find Plenty of Eu-

Joyment--Notes and Gossip. CAPE MAY, August 3.-To-night Cape May

is in its glory, because it is the height of the season, or, at least, one week away from its height, allowing that one week from to-morrow will be the biggest day of 1889 here. Taking all in all, Cape May has done fairly well this year so far, but the outlook for this month is very bright, all the leading hotels having their coms engaged for the main part of the month, The season did not commence as early as it might, but it promises to extend far into Sep-tember, when Cape May is really at its best. But as it is now, everything is as pleasant as one could ask. The beach is througed daily with pretty maidens. There is also the casual observer and the reporter, accompanied by his sketch artist, who are laying their best plans and improving every opportunity to capture a good picture both by photograph and pen. The bathing for the past week has been all that could be desired, and everyone that has entered the water on these days feels invigorated to a wonderful degree. The number of bathers, though not up to the standard, is quite large,

and includes about all the Pittsburgers who happen this way. There are more pretty women at Cape May. and unmarried ones at that, than have been noticed for several seasons. Of course they receive much attention.

About the hotels Pittsburgers are more

About the hotels Pittsburgers are more numerous to-night than at any previous time during the present season; but taking them as they come they will have to come in increased numbers if they expect to equal or exceed the number of last year's visitors.

The pier has a great attraction for Pittsburgers. Although the light operas given there are very light, they afford some amusement for those who desire a change, one or two nights in the week, from the routine of dances. One can enjoy listening to a comic song and at the same time get a good cool breeze from off the ocean.

COMING TO THE SPASHORE is only a luxury, not a necessity, and, as the general temperature all over the country has been cool, the seashore travel has so far been light. Another reason is that great numbers

have gone to Europa.

The Advisory Board of the Relief Department of the Pennsylvania Railroad held its ment of the Pennsylvania Railroad held its quarterly session here early in the week at the Stockton. The party consisted of Charles E. Pugh, general manager; M. Riebenack, assistant controller: S. M. Prevost, general superintendent of transportation; Robert Pitcairn, general agent of the Pittsburg division; Spencer Meade, superintendent of the Northern Central Railway; A. O. Dayton, superintendent of the West Jersey Railroad; Joseph Crawford, superintendent of the New York division; Holmes D. Ely, Secretary of the relief department; W. D. McKelvey, O. W. Coombs, H. K. Stout, J. H. Nichols, Edward Foulke, H. F. Kenney, William McIntyre, C. W. Thompson and W. C. C. McCurdy, of Pittsburg. The trunk line meeting will be held here on the 14th inst.

trunk line meeting will be held here on the lith inst.

The Cape May ball team now claims the amateur championship of Pennsylvania, New Jersey and New York. This club won 25 out of 25 games last year, and has won 15 and lost none this season. They are playing great ball. On Thursday, August 16, a benefit will be given to James Robinson, the trainer of the ream and the well-known trainer of the Princeton College athletes. The grounds of the athletic club are used continually for tennis courts, croquet, baseball and other sports that please the ladies as well as the gentlemen.

The cuchre party craze has seized hold of the hearts and minds of almost everyone here, and every night every hotel or house in town is the scene of one of these happy gatherings.

The hops of Tuesday, Thursday and Saturday evenings at the Stockton Hotel and Congress Hall are great occasions, and Pittsburg ladies are largely represented.

The children's ball given in Congress Hall to-night was one of the great events of the season. There were fancy dances, and those who looked on enjoyed themselves immensely.

The belle of the season is Miss Sallie Hart, the pretty and accomplished daughter of William V. Hart, of Philadelphia. She is much admired for her beauty. The party is stopping at Congress Hall.

CULTURED CHAUTAUQUA.

Sejourners by the Lake Find Their Time Fully Occupied.

ISPECIAL TELEGRAM TO THE DISPATCH. CHAUTAUQUA, August &-On his first visit to Chantauqua a lecturer is subjected to a try-ing ordeal. His audience is both critical and impatient. If he does not succeed in interesting them in the first ten minutes he is doomed to failure. The people leave until the audience is scarcely half its original size. To be sure, time is precious at Chautanqua, and one cannot afford to waste it over second rate lectures, but it cannot be decided in the first few minutes that a lecture will not be a success, and it is unjust not to give it a fair trial. Many good

that a lecture will not be a success, and it is unjust not to give it a fair trial. Many good things are lost in this way.

A twilight concert is given every evening on the Point by Rogers' Band. This is the most thoroughly enjoyed part of the day. Everyone is out. It is delightful to walk up and down under the trees, with that rich, exquisite music floating down to you, and to watch the sunset, the groups of gaily dressed people, and the innumerable boats gliding lazily about. Chantauqua is quite like a fashionable watering place at that hour.

Mr. Burbank, of New York, gave his first reading Thursday evening. He is a favorite here, so the amphitheater was well filled. Indeed, the largest audience that the amphitheater has held this season gathered to hear him. He carried the people by storm. The enthusiasm has not reached such a pitch before this season.

The regard in which James Whitcomb Riley is held is frequently demonstrated in a most pleasing manner. At the mention of his name, infectious appliance is sure to break out.

People were somewhat disappointed in the lecture given by Mrs. J. Ellen Foster, of Iowa, on the temperance reform. It was not as strong as her reputation had warranted them in expecting. She tore theories to pieces without giving anything better. She does not believe in prohibition, high license or local option. Her view is that the liquor traffic should be so restricted as to practically abolish it.

Miss Annie Park, of Boston, is again earliaving as with the aweet music she produces on the cornet.

Almost every hour of the day is full now, be-

lectures are exactly what are needed as a stimulant. His most noticeable characteristic is his railery against superstitutous. This is his hobby. He has so keen an insight into human nature, and draws so largely from his own wide experience, that it is no wonder his lectures possess an unusual charm. He is one of the most versatile speakers who ever graced the Chautauqua platform.

The steamers do not make connections with the trains on the Eric road this season. In order to reach Lakewood in time for your train you are obliged to take an early boat, and wait there several hours. This is a very pleasing arrangement, since it obviates the necessity of any anxiety on your part about reaching there in time. It also gives you a chance to look about Lakewood, and if your train leaves early in the day it has the extremely desirable effect of getting you up early in the morning.

JOLLY CROWDS AT BEDFORD.

Tellers at the Springs. REPECIAL TELEGRAM TO THE DISPATCE.]

BEDFORD SPRINGS, August 2.—As a rule this has been a bad season for summer resorts, but something appears to have drawn an unusually large crowd to Bedford. August promises to surpass July in numbers, and it is noticeable that the July crowd are stayers, some having been here the entire month. The prominent people here have been unusually numerous. As the eye wanders over the lawn at the Springs it is attracted by the form of ex-Senator Wallace, sitting talking to ex-Governor Curtin. Every now and then a peal of laughter comes from the crowd that always surrounds them. Judge Hawkins, by the way, is also quite a story teller, but he and John Hampton are trying to see who can catch the most case or else explain in the smoothest way why the fish would not bite. Then there's still another floe conversationalist who comes to drink Bedford water and recuperate—George H. Weishons, of Pittsburg.

The other evening I noticed on horseback a [SPECIAL TELEGRAM TO THE DISPATCH.]

water and recuperate—George H. Weishons, of Pittaburg.

The other evening I noticed on horseback a handsome-looking old gentleman. On inquiry I found out he was from Pittaburg, and that his name was Christopher Zug. He first visited Beford Springs in 1827, and he mounts his horse as well now as any of the boys.

The tally-he coach is on the go almost every pleasant evening, and can be heard for miles away with its merry load of freight.

The Pittsburgers who have recently placed their autographs or the Springs register are Frank S. Willock, A. S. Smith, Mys. Thomas H. Dickson, Miss Martha Guthrie, Mr. John McKee, D. D. Burree, Robert Burree, Captain Batchellor, Mre. F. M. Magee and family, Miss Mamie Magee, Aug. Mutrie, Otto F. Felix, John H. Muller and son, C. Zug, A. R. Reineman, J. H. Reid, James M. Bailey, Max W. Frank, Hr H. Jack, W. J. Howard, J. D. Nicholson, Mr. and Mrs. A. C. Milliken, Mr. and Mrs. Max Morehead.

George Toergo's benefit at the Springs last night was the largest ever given here. Toerge and his orchestra are very popular here.

EVOLUTION OF TASTE As Shown in the Latest Window

SIMPLICITY NOW ALL THE STYLE.

Shades and Wall Hangings.

Wood Filagree and Stained Glass for Summer Cottages.

A FEW ANSWERS TO CORRESPONDENTS

IWRITTEN FOR THE DISPATCH. I The evolution of taste in window shades affords the critic study. From the green paper still seen well preserved in old farm houses, the next step was the buff holland, now sacred to kitchen premises, then the gray linen and the dazzling white roller ind, which still puts the eyes out with its high light in a glaring room. Next fashion in the metropolis took a daring flight, and red parlor blinds shone down Fifth avenue for a season, and vanished to quarters impossible to polite acquaintance. They suited too well the tastes of gambling dens and fortune-tellers. The sober elegance of the soft, natural Holland, embroidered in Byzantine colors on the lower border, was the best

style, and always will be good.

This year the striped linen blinds reflect oreign taste, and are very pretty for country houses in the leaf-green and flax stripe, the cool, bright blue and white, or crimson and mixed white, beside the twilled tape stripes in unbleached gray and white. The color stripes give a subdued liveliness to a long, dim summer sitting room, or, as housekeepers say, they furnish a room well. Instead of hemming the sides, a narrow silk binding is stitched on and pressed very flat, which adds a finish and runs better on the roller. Plain hems for the lower edge are preferred to fringe, which curls and looks shabby.

THEY LAST WELL. These heavy linen blinds are not supposed to need washing or renewal under eight or ten years. A pair of unbleached linen, which had been hanging in windows for five years, showed no need of refreshing. Practically, with the attentive care due

Practically, with the attentive care due good furnishings, they never call for renovating. A solled curtain or chair or broken furniture is a witness against the breeding of a family. In English country houses suits of furniture 300 years old are shown in good keeping, and pieces exhibited at the Centennial festival, quite as old, were in better case than modern sets after air years' use. Perhaps when we can afford things in really good finish and design we will perforce learn to preserve them.

The taste for tapestry and luxurious wall hangings is upon this country, extravagant and unsanitary and unsatisfactory as such things are. In one of those artist dens of the bricabrac shops wich educate people into this sort of spurious luxury. I heard an ambitious lad, looking at the velvet-lined walls, say to his mother, "Why can't we have our house like this!" Why indeed, can't people on \$2,500, to \$0,000 a year, cover their walls with green or purple velvet at \$13 a yard? What should they want it for if they could afford it?

ONLY FIT FOR SHOW.

House decorators do not recommend fabrics

House decorators do not recommend fabrics of any kind for walls on any ground except that of expense and show. Velvet and tapes-try harbor no end of dost, and dust invites in-sects. Heavy fabric deadens sound so that it is next to impossible to have good music in these padded rooms and it makes the air stuffy, dead and depressing. Common houses are well nigh intolerable with their turcoman nigh intolerable with their turcoman curtains and portieres which hold stale air of yesterday in their folds, and forbid the free passage of fresh breath. Fashion by way of compromise, hangs its walls with panels of Bobemian tapestry, woven of dyed cotten in the panels of old designs, hawking parties, battles, or court scenes, very well represented in rich dark coloring, which would drive a sensitive person to suicide with its sember effect, however, after our cheerful home surroundings. The cotton tapestry is not prey to moths, down of court court for a most or require a man, and our require a man, and are required a man, and a man and a man, and a man and a man, and a man ings. The cotton tapestry is not prey to moths, does not cost over \$0 a panel, or require a man to watch it all summer for fear of injury by damp, mold or buffalo bug, as wool or velvet does. In the large houses of New York trusty men go the rounds every week, open the rugs, curtains and tapestry and lift the chair covers to brush and beat for moth. Your butler at \$40 a week and housekeeper at \$30, can't be expected to look after such matters and see that any of the 20 house servants do it.

SOME ARTISTIC EFFECTS. The new artistic sense rejects these cumbrous follies for simple homes. Tapestry would do for facing coarse brick and mortar walls, in times when people of degree did not mind being overrun with vermin under their magnificence. Modern taste fills its panels with painted tapestry, which closely resemble the woven, and is free from its disabilities the woven, and is free from its disabilities. The demand is for washable surfaces, on walls, if not lincrusta with its sprawly decorations, then the tile-finished paper, which washes with a sponge, or painted plaster in delicate, cheerful Japanese designs of fruit blossoms, reeds and flying birds, or at least wall paper of quality which will bear a coat of white shellac varuish, like engahell finish. The finest finish to any wall, and most lasting, is given by white of egg. in which the Italian masters painted their great frescoes, and found their own eggs, when Popes and princes were too stingy to pay for them.

when Popes and princes were too stingy to pay for them.

The summer cottages are falling out with the tesselated hardwood carpets, as they are called. In our dry, hot air the blocks shrink, warp and in dog days swell again till they are out of piece. Then Bridget's treatment does not agree with wood, and the general antique effect of grimy bak and butternut is depressing, and it is not always easy to get a man from town to do the floors every week. So moderate, sagacious folk fell back on well laid, painted floors, in oak-brown, chestnut, Vandyke brown or terra cotta, done in oil, with a coating of thin sheliac after the last of paint, for gloss. This gives a floor which will wear and look as well as a waxed floor, unless special pains are taken with the latter. The check matting in tea colors and terra cotta or olive check, are favored rather than the large figured mattings, and bamboo, rattan and splint or rush furniture supersedes all other for summer, though people acquire a liking for these springy, clean, light chairs and lounges through the year.

PRETTY INNOVATIONS.

The gay Viennese tables and cabinets, in light color, painted with bouquets and varnished like lacquer, gomwell with rattan, for of all inconvenient, "wobbly" things, the rattan and other woven tables are the worst. Bright blue and red linen, twilled or plain finish, is the material for cushions, enriched with floss embroideries and short tassel fringes of colors of the work. Portieres are of linen, crash, gay with many colored cross stiches as a Bagdad hanging, and tasseled in Spanish taste. But the bamboo fringe bangings are preferred for warm weather, as they let the air through and make picturesque variety.

Then, everywhere you turn in the new cottages the new pierced woodwork confronts you, much to the benefit of free ventilation. Transoms over doors and windows, wrought screens in ballways and pierced doors into passages, or open panels filled with twisted woodwork let the draught between rooms in unexpected ways. By next year the houses will be pretty much wood fligree, to the relief of stained glass, which really tinges one's views of life, there is so much of it, and that is so greadful. The portable Berlin iron fireplaces which are almost as easy to move as the old sheet iron airtight stoves, are heautiful in their artistic modeling, in contrast to the glitter and nickel plate of "parlor stoves," and an open stove is part of every cottage equipment. For a week and more fires have been needed here, near the coast, night and morping, and have been cheerful all day sometimes. PRETTY INNOVATIONS.

TO REMOVE FRECKLES.

"Kate D." goes to college in September and is anxious to take the freekles off her hands before that time. She says she is 17 and has "spent most of her time trying to make her hands look better." That is because she is only 17. She may spend more of her invaluable time washing her hands in cider vinegar, or she may take one-half pound washing soda and the same of chloride of lime, dissolved in three quarts of boiling water, and when cool enough bathe the backs of her hands with the water, not forgetting to rinse them with water with half a cup of vinegar to the quart. This will remove freekles if anything will, and is sovereign for taking out mildew from fabric. Also try common salt moistened with lemon juice to a paste, allowed to dry on the freekles in the sun—when dry five minutes, wash off and apply cold cream, and I hope Kate's studies will do her hands credit.

"Spolled Beauty." An otherwise pretty neck has a number of little brown moles. A friend advised the use of nitric acid, but the moles come back, and when I tried it on my face it left a scar, an ugly, pinkish raised place, which I tried to heal with salt and water and failed." The acids are unsafe applications on ordinary bands. The best way to remove moles is loose, is to draw them out between thumb and finger and tie a silk thread around the neck of the mole. Cut the ends of silk close and leave it on for three days or more, then tie again till the mole wears off. A small blister will remove the mole sometimes when other means fail. A touch of lodine or lunar caustic often cures, but care must be taken not to mistake a "mother's" mark or nature's nor a mole. Lot the scar alone for a few months, only coating it with vaseline or carbolic oinment if sore. When the skin heals try lunar caustic often oures, worth from the druggist's will remove a score of warts and moles. Wet the end of the pencil, in which shape it comes, and rub o

in Russia and the persecution of the Jews in the land of the Czar. The plot of the play is an original one and is clever in conception. There are several startling scenes well calculated to inspire an audience to intense enthusiasm, and the comedy is clean and artistically interspersed. A number of new stage settings will be seen, and the contumes worn are both costly and correct. Such a play and a good company ought to guarantee a thoroughly enjoyable performance. "The Money Lender" promises to fulfill those qualifications, and the outlook for large audiences at Harris' Theater this week is favorable.

All the places of amusement will soon be open again. Many improvements have been made in all during the summer, but of these and of the plans of the managers for the coming season THE DISPATCH will speak in detail next week. Mr. Guilck has returned after his summer outing, looking healthy and cheerful, and appearing confluent of another successful season at the Bijou. This popular house will open Thursday, August 15, with an attraction that ranks among the very best in its line. Cleveland's Haverly Minstrels, including Billy Emerson, Hughey Dougherty and a great number of burnt cork artists of the first-class, will give four performances, beginning on that date. A strong list of attractions has been booked, and there is every reason to think that the Bijou's popularity and prosperity will continue.

The "Country Fair" given last Thursday evening on the club grounds of the Sewickley Athletic Association was the most successful entertainment throughout ever given in the vailey. Two hundred and fifty dollars was the sum netted, and it will be used in making improvements in the club house. The grounds were prattily decorated with Chinese lanterns, flags and bunting, and the pretty booths erected for the candy, ice cream and lemonade, together with a gypsy encampment, gave the grounds a beautiful and picturesque appearance. The most interesting part of the effensive programme, which included contests in all outdoor sports, was a buriesque game of tennis. The entries were Mr. Porter, Mr. Doyle, Mr. White-sell and Mr. Page Warden, each dressed in the most grotesque of ladies dresses, and with their anties and little affectations causing a great deal of laughter. There were four teams ontered for the quoit contest, the successful ones being Captain George Cochran and Mr. A. B. Starr, each receiving a watch charm in the form of a silver quoit. Mr. Arthur Nevin secured the prize, a pair of allver cuf buttons, in the sack race. Mr. John Temple was rewarded for his high kick by a moon scarf pin. The highest jump, five feet one linch, was made by Mr. Edward McMillan, and he carried off the grasshopper scarf vin. The bowling prizes, miniature silver tenpins, were won by Miss McClurg and Mr. William Miller. Miniature pigs were presented to Mr. R. R. Miller and James Arrott, winners of the three-legged race.
